Minutes

Agenda item: Mobile Application Figma Flow **Presenter** Fiona Seah Shu Hui

Discussion:

- Went through Draft 01 of Hi-Fi prototype on Figma for mobile application

Remarks:

Drivers

- Mobile number only for driver's log in.
- Camera is needed to scan bar code.
- For user profile, drivers are able to edit their own details.
- Driver will need to have pending and completed jobs section.
- Important notification need popup
- Coordinator can extract user profile photo stored in web server
- Need to separate between collection and deliveries.

Coordinators

- Job summary split by drivers for admin and coordinators
- Homepage would be good to display the completion status of each driver (on-hand/current)
- Would be good to change scheduled and ad hoc jobs to pending and completed jobs.
- Would be good to distinctly identify the difference between collection and delivery jobs.

Admin

- License number to change to Vehicle number
- Mandatory to update vehicle model
- Joleen will provide the list of information that is needed for the vehicle details

Customer

- There are missing information for customer order page.
- Customer no need particulars, all customers will share 1 account.
- Add hotline option for the customer to call.
