

Team Meeting

25 October 2021, Monday

Microsoft Teams

Meeting Topic Project Prototyping – Hi-Fi Figma Version 02

Attendees: Amirah Binte Adam (Intern)
Fiona Seah Shu Hui (Intern)
Joleen Ng (Industry Supervisor)

Minutes

Agenda item: Mobile Flow **Presenter:** Fiona Seah Shu Hui

Discussion:

Went through Figma version 01

Conclusions:

- Pop up if there's a case where 10 jobs were assigned.
- Each driver will have the contact list of customers.
- Hotline page must be editable (for the admin side).
- Different drivers have different hotline.
- Good to have search button on pending/completed jobs page to search by customer.
- Need to add job number when displaying jobs.
- If driver have 20 deliveries and system have more than 20, not possible to search the whole list. Therefore, will be better if can search job by scanning barcode or search job by job no.
- Drivers need to know which job they are doing, the only difference is the job number, therefore need display job number.
- Need a scan barcode button at pending jobs so drivers can scan directly.
- Future development – various color scheme

Agenda item: Web Application Flow **Presenter:** Amirah Binte Adam

Discussion:

Went through Figma version 01

Conclusions:

- Add hotline page same as mobile. Different drivers have different hotline
- Web application should have the same functionalities with mobile.

Agenda item: Subsequence Plan

Discussion:

- Developing driver's role – Front-End (2 weeks) & Back-End (3 weeks)
- BTC Schedules
